Letter of Assurance

Counter-Hard
Counter-Guards

In accordance with USDA regulations 9 CFR, Section 416.4 and the Food Safety Inspection Service's "Sanitation Performance Compliance Guide," Innovative Concrete Technologies issues this letter of assurance. When properly applied, Counter-Hard and Counter-Guard concrete sealer/hardener/densifiers contain no harmful compounds that will contaminate food and meat handling and processing equipment or facilities. In addition, Counter-Hard and Counter-guard will make concrete countertops less porous and easier to clean, creating an environment that is less susceptible to the proliferation of harmful bacteria.
