A magnificent metamorphosis of forms, the Sevenfold creates an evolving sequence of water movements, reminiscent of interlocking vertebrae. From the source it is quick and vigorous, then as it flows at the centre point it becomes more languid and harmonious, developing speed through a double vortex into forward swinging, lively water movements towards the base. It can be used complete or in various part sets, embedded or freestanding.

Standard Colors

Bone  Marsh Green  Coco  Portland Grey  Latte

Width: 61”
Height: 60”
Length: 130”
Weight: 1464 lbs.
