Revitalize water for gardens and landscapes / Improve mood and energy with negative ions / Calming sound of babbling water / Sustainably built with green materials / Easy and efficient to install and operate

SHAMROCK

The Shamrock Flowform is an impressive water feature that is ideal for larger interior spaces or a wide variety of landscape settings. With a pulsing figure-eight movement, it’s ideal for water play, sensory or therapy gardens, pond aeration and supporting koi fish or aquatic plants. With its large raidal form, the Shamrock can be positioned at ground level, appear to be floating within a pond setting or set in a raised bed setting (with or without seating).

Diameter: 67”
